Education

University of Texas at Dallas

Bachelor of Science in Computer Science

2025

Richardson, Texas

Technical Skills

Cloud & Security: Azure (Defender for Cloud, Sentinel, Entra ID, AI Foundry), CSPM, IAM, SIEM/SOAR, CrowdStrike
Security Tools: Defender, Splunk, WIZ, OWASP ZAP, Burp Suite, MITRE ATT&CK, BlackDuck, Kali
Technologies/Frameworks: PowerShell, KQL, Jenkins, Python, PCI DSS, NIST, CIS, ISO 27001, Bash
DevOps/Tools: Terraform, VS Code, GitHub, GitLab, Jenkins, Linux, JIRA, Confluence, MS Office, Logic Apps, Power BI

Experience

TOSHIBA

May 2025 – Present

Product Security Engineer (Cloud)

Frisco, Texas

- Improved cloud security posture by 35% within six months by remediating over 100+ misconfigurations identified through Defender for Cloud, ensuring 100% alignment with CIS benchmarks.
- Conducted application security testing using SAST, DAST, and SCA methodologies on enterprise SaaS solutions, performing security assessments against OWASP Top 10 and providing remediation guidance to development teams for secure CI/CD integration.
- Successfully managed endpoint security for 11000+ assets, reducing successful malware execution attempts through proactive threat protection and hardening.
- Automated security operations using PowerShell and KQL scripts to identify critical CVEs, query Azure Resource Graph for security posture monitoring, and accelerate threat detection workflows leveraging AI/LLM technologies.

AI CONNEX

May 2024 – August 2024

Cybersecurity Intern

Frisco, Texas

- Collaborated with a team to organize events, focusing on AI to promote knowledge sharing and best practices.
- Gained proficiency in (EDR) software and network protocols, enhancing skills in threat detection and mitigation.
- Familiarized with the threat landscape by utilizing OSINT threat tools to identify and analyze potential vulnerabilities.

Projects

Agentic AI Threat Assessment System | Python, Google Agentic Architecture

December 2025

- Developed an autonomous AI agent system integrated with cloud deployment infrastructure to perform real time threat assessment and security.
- Implemented agent orchestration framework to continuously monitor cloud resources, analyze threat intelligence feeds.
- Automated the classification of 200+ daily security logs, and attack vector analysis achieving a 90% accuracy rate in risk severity labeling compared to manual assessments.

AI Security Agent for Cloud Monitoring | RAG, AI Foundry

August 2025

- Built a security agent using Azure AI Foundry to detect publicly exposed cloud resources and identify security vulnerabilities across Azure infrastructure.
- Integrated email notification system that alerts resource owners with detailed exposure reports and guidance upon command-based triggers.
- Decreased Mean Time to Respond (MTTR) by 45% by automating the notification of resource owners for publicly exposed assets.

Achievements / Certifications

- Intern of the Cohort Award at Toshiba (Fall 2025):** Recognized for outstanding performance, dedication, and contribution as a Product Security Engineer Intern.
- WayUp Top Intern (Summer 2025):** Elected for being a top intern for contribution to company as an intern.
- CompTIA Security+**
- GenAI for SOC Analysts**
- SOC 2 Compliance Essential**

Leadership / Extracurricular

Cybersecurity Community Team

August 2024 – Present

President

UTD

- Leading a mentorship program, guiding peers in skill development and fostering a collaborative environment.
- Engaging in discussions on recent topics, industry news, and cyber emerging threats to stay informed on current trends.
- Staying current with emerging cybersecurity trends, ransomware campaigns, AI/ML vulnerabilities to enhance awareness.
