Education

University of Texas at Dallas

Bachelor of Science in Computer Science

2025

Richardson, Texas

Technical Skills

Cloud & Security: Azure (Defender for Cloud, Sentinel, Entra ID, AI Foundry), CSPM, IAM, SIEM/SOAR, CrowdStrike

Security Tools: Defender, Splunk, WIZ, OWASP ZAP, Burp Suite, MITRE ATT&CK, BlackDuck, Kali

Technologies/Frameworks: PowerShell, KQL, Jenkins, Python, PCI DSS, NIST, CIS, ISO 27001, Bash, Nmap, Docker

Other Tools: Terraform, VS Code, GitHub, GitLab, Jenkins, Linux, JIRA, Confluence, MS Office, Logic Apps, Power BI, Wireshark,

Experience

TOSHIBA

Dec 2025 – Present

Cloud Security Analyst

Frisco, Texas

- Improved cloud security posture by 35% within six months by remediating over 100+ misconfigurations identified through Defender for Cloud, ensuring 100% alignment with CIS benchmarks.
- Monitored and secured endpoint security for 11000+ assets, reducing successful malware execution attempts through proactive threat protection and hardening.
- Triage and investigated security alerts within Sentinel and Defender, identifying potential anomalies and escalating high priority incidents for remediation.

TOSHIBA

May 2025 – Dec 2025

Product Security Engineer Intern

- Automated security operations using PowerShell and KQL scripts to identify critical CVEs, query Azure Resource Graph for security posture monitoring, and accelerate threat detection workflows leveraging AI/LLM technologies.
- Conducted application security testing using SAST, DAST, and SCA on enterprise SaaS solutions, performing security assessments against OWASP Top 10 and providing remediation guidance to development teams for secure CI/CD integration.

AI CONNEX

May 2024 – August 2024

Cybersecurity Intern

Frisco, Texas

- Supported initiatives at an AI-focused startup, contributing to event coordination and knowledge-sharing sessions and presentations.
- Gained hands-on exposure to EDR software and network protocol analysis, applying skills to threat detection and mitigation exercises.
- Conducted OSINT research using threat intelligence tools to identify and analyze potential vulnerabilities within the threat landscape.

Projects

Agentic AI Threat Assessment System | Python, Google Agentic Architecture

[MDFC Triage](#)

- Developed an autonomous AI agent system integrated with cloud deployment infrastructure to perform real time threat assessment and security.
- Implemented agent orchestration framework to continuously monitor cloud resources, analyze threat intelligence feeds.
- Automated the classification of 200+ daily security logs, and attack vector analysis achieving a 90% accuracy rate in risk severity labeling compared to manual assessments.

CyberTrack - AI Mentor & Goal Tracking App | Next.js, Claude API, TypeScript, Vercel |

[CyberTrack](#)

- I had a problem and found a solution; I built an app where recent graduates or job hunters will track their weekly goals here to achieve a bigger goal with this app.
- Built a full-stack goal-tracking web app for job seekers with AI-powered onboarding that calls the Claude API to generate personalized weekly goal categories and starter tasks from 4 user inputs.
- Implemented a 4-step conversational onboarding flow with animated transitions, weekly streak tracking, week rollover logic, and an AI mentor chat with full conversation history persistence.

Achievements / Certifications

- Intern of the Cohort Award at Toshiba (Fall 2025):** Recognized for outstanding performance, dedication, and contribution as a Product Security Engineer Intern.
- WayUp Top Intern (Summer 2025):** Elected for being a top intern for contribution to company as an intern.
- CompTIA Security+
- GenAI for SOC Analysts
- SOC 2 Compliance Essential

Leadership / Extracurricular

Cybersecurity Community Team

August 2024 – Present

President

UTD

- Leading a mentorship program, guiding peers in skill development and fostering a collaborative environment.
- Engaging in discussions on recent topics, industry news, and cyber emerging threats to stay informed on current trends.
- Staying current with emerging cybersecurity trends, ransomware campaigns, AI/ML vulnerabilities to enhance awareness.
